

Name: _____

Body Percussion Reflection

1. Were you surprised at your ability to be able to create and perform a body percussion routine?

I was surprised at my ability to perform my routine. I thought that I was going to mess up a lot, but the recording went pretty smoothly.

2. Where any combination of body percussion patterns more difficult than expected as you performed it?

My routine didn't have a lot of stomping in it, but when it did come up, it was a little tricky to remember the stomping.

3. Would you change any patterns of your body percussion routine if you had the ability to?

I did not use any patting in my routine, so I might have put a little bit more patting in it.
